PT. BIRU SAKTI MARITIM

OUR SERVICES

➔ Freight Consolidation

A cargo delivery method that refers to the merging of several individual shipments or several shipments between companies to be made into one shipment.

This arrangement allows goods to be shipped at a lower price and offers greater security. We can collect your goods and cargo from all suppliers located in various cities in Surabaya and consolidate them into one container to help you save on shipping costs.

➔ Buyer Agency

We can assist you and your company professionally, who specializes in searching for, scooping out and evaluating Goods, Customs clearance, International Export, and Import Documentation, Shipping Insurance, Packing and Storage, Management of Inventory, as well as negotiating or bidding at auction on your behalf.

OUR SERVICES

➔ Project Management

National or International transportation projects of large, heavy, high-value and complex equipment. The materials can be sourced globally, or from a single individual location. Oil and gas, wind power, mining, engineering, and construction industries. We are used to handling cargo projects that require a detailed engineering process to stay within the projected budget and be completed on time. Setting projects preparation thoroughly in the shipping sector and assist with data-oriented projects. As well as strategizing every movement and ensuring the goods arrive in good condition and on time. Together with us accompanying your strategic projects, your work will be more effective in terms of costs and resources

➔ Ship Gathering

We serves one or several shipments, and both can cover a wide range of shipping volumes and cargo values. This can mean one or more pieces of equipment transported from point A to point B, or various destinations over a period of time. It can move by land, sea, or air, and can involve trucks, trains, cranes, ships, barges and / or aircraft. We pay attention to the cargo in detail. We are planning before preparation for efficient operation. Maintaining efficiency in such complex cargo operations to eliminates risks.
